CERTIFICATES

- Microsoft Azure AI Fundamentals - 11.2022
- Certificate in Advanced English C1 (CAE) 08.2019
- Scrum Master Certified 03.2021

LANGUAGES

- English C1
- German A2
- Polish C2

PROJECTS

- AI Battle-Royale bot - built and improved reinforcement learning bots for a battle-royale game during a multi-week competition.
- Hangman Game - optimized word-guessing algorithm in a client-server setup.
- Nutrition Assistant - voice controlled smart home assistant (in polish), uses: python/MQTT.
- Study of factors influencing the daily cost of accommodation in Warsaw - conducted an empirical analysis leveraging regression models to quantify the impact of key determinants.

WORK EXPERIENCE

Goldman Sachs - Quantitative Modeller

Associate, Risk Engineering Team, 07.25 - now

- Started AI initiatives within the Risk Strats Team, building ML model (scikit-learn, tensorflow) for exposure prediction from market data, LLM tool for automating PDF model documentation review.
- Developed a multi-agent risk system using Google's ADK, delegating queries to specialized agents for faster exposure insights.
- Building a credit risk model in Slang for calculating spot stressed collateralised current exposure under adverse market scenarios.
- Monitoring and troubleshooting production model runs, optimizing performance of computationally intensive calculations to prevent delays in critical risk reporting.

UBS - Data Scientist

Empirical Scientific Approaches Team, 02.2023 - 06.2025

Authorized Officer | Promotion from Employee in 2025

- Led the design and development of an Agentic Statistical Research Copilot using LangChain, implementing RAG over internal tooling code to enhance modelling capabilities.
- Implemented hypothesis-driven empirical methods to improve stock recommendations, using OLS regression, panel data analysis (fixed effects), and time series forecasting (ARIMA) via statsmodels .
- Led technical workshops across multiple divisions, teaching teams how to automate their work with Python and encouraging knowledge sharing within the organization.

Grid Dynamics - Data Science Intern

05.2022 - 01.2023

- Designed and developed recommendation engines using Collaborative Filtering and Content based filtering.
- Developed web-based mask detection application using tensorflow/keras and mobile application using TensorFlow.js and React Native for mask detection.

Alior Bank

Robotics Maintenance Specialist, Robotics Team | 09.2019 – 03.2020

- Automated business processes by developing and deploying Blue Prism RPA solutions.

Junior Specialist, Logistics Department | 06.2018 – 08.2018

- Verified and processed issued invoices.

EDUCATION

Master's degree in Data Science

AGH University of Science and Technology in Cracow (Ranked #2 in Poland in Perspektywy Ranking)

2021 - 2023

Thesis project: Application of machine learning algorithms in recommendation systems - Introduces a novel hybrid model which integrates deep neural networks with NMF, focuses on identifying relationships between users to improve recommendation quality.

Bachelor's degree in Computer Science and Econometrics

AGH University of Science and Technology in Cracow (Ranked #2 in Poland in Perspektywy Ranking)

2018 - 2021

Thesis project: Epidemic simulator based on multi-agent system. Library for quick and easy prototyping of epidemiological simulations.

SKILLS

- Programming Languages: Python, SQL, R, SLANG (Goldman Sachs proprietary).
- Extensive experience with Python for data analysis and visualization, including Pandas, NumPy, Plotly, Seaborn, and Matplotlib.
- Agent-based systems: RAG pipelines, LangChain, multi-agent architectures, tool-augmented LLMs, prompting and evaluation of LLM outputs.
- Proficient in machine learning, with hands-on experience in Statsmodels, Scikit-learn, PyTorch, TensorFlow.
- Quantitative Finance Knowledge: counterparty credit risk modelling, exposure metrics and stress testing under regulatory frameworks.
- Time series forecasting (ARIMA), regression (OLS, panel data, fixed effects)
- Linux, version control using Git, CI/CD pipelines.
